Assignment 2

For the second assignment, I created an app which allows the user to do the following, in the specified order:

1. Create a SQLite database (Figure 1).
2. Create a table within the newly created database (Figure 2). This table is pre-populated with sample values:
 - a. Jordan, 10 years old, 111-222-3333
 - b. Sam, 20 years old, 444-555-6666
 - c. Alex, 30 years old, 777-888-9999
3. Query the database to retrieve and display all the entries (Figure 3).
